

Power Point Study– 02-2 Functional Groups**Name:**

1) Classify each of the following compounds as their functional group.

2) Circle and identify the functional groups in the following compounds.

3) The compound shown below is a synthetic estrogen. It is marketed as an oral contraceptive under the name Enovid. The functional groups present in it are:

- Ether, alcohol, alkyne.
- Aldehyde, alkene, alkyne, alcohol.
- Alcohol, carboxylic acid, alkene, alkyne.
- Ketone, alkene, alcohol, alkyne.
- Amine, alkene, ether, alkyne.
