

1. Identify the following structures as the same, constitutional isomers or different.

2. Classify the following alcohols as primary, secondary or tertiary.

3. Classify the following amines as primary, secondary or tertiary.

4. There are four alkyl bromides with the formula $\text{C}_4\text{H}_9\text{Br}$. Write their structural formulas and classify each as primary, secondary or tertiary.

5. There are seven isomeric compounds with the formula $C_4H_{10}O$. Write their structures and classify each compound according to its functional group.

6. Write the structural formulas for each of the following:

a) Three primary alcohols with the formula C_4H_8O .	
b) A secondary alcohol with the formula C_3H_6O .	
c) A tertiary alcohol with the formula C_4H_8O .	
d) Two esters with the formula $C_3H_6O_2$.	
e) Four primary alkyl halides with the formula $C_5H_{11}Br$.	
f) Three secondary alkyl halides with the formula $C_5H_{11}Br$.	

g) A tertiary alkyl halide with the formula $C_5H_{11}Br$.	
h) Three aldehydes with the formula $C_5H_{10}O$.	
i) Three ketones with the formula $C_5H_{10}O$.	
j) Two primary amines with the formula C_3H_9N .	
k) A secondary amine with the formula C_3H_9N .	
l) A tertiary amine with the formula C_3H_9N .	
m) Two amides with with the formula C_2H_5NO .
